MEDADData Solution

MEDADData™ is a custom, fully turnkey data solution that involves a vehicle-mounted datalogger, vehicle network integration, secure cloud-based data capture and data analysis, and dashboarding.

The data that machines produce can be used for diagnostic and preventative maintenance, improving efficiency, firmware updates and more. MEDADData is fully customized to your needs. It can include:

- **On-Edge Logic** to capture data in real time at the source
- **Fleet Management Integration** for geo-tracking, maintenance, etc.
- **3rd Party Data Management & Analysis** with secure data storage

DASHBOARDS

Highly customizable dashboards can serve one or more purposes:

- **Customer Dashboard** for KPI monitoring
- **Operator Dashboard** for motor & systems data
- **Support Dashboard** for service and diagnostics team
- **Firmware Push Dashboard** for customized firmware updates

Whether you simply want the data, or ongoing monitoring and firmware updates, we can customize a solution that's just right for you.
